ance Notes on Codes and Abbreviations" appearing at the begin-  
ning of each regular issue of the PCT Gazette.

(54) Title: INTERLOCKED VIBRATION REDUCTION MOUNT

(57) Abstract: A vibration reduction mount (10) is  
provided having an improved construction in which the  
mount includes a housing element (12) having an opening  
(30) adapted to receive a core element (14) with the core  
element (14) being rotatable after insertion into the housing  
element (12) or interlocking the core element (14) in the  
housing element (12). An elastomeric material (16) is then  
injected into the housing element (12) in order to secure  
the core element (14) within the housing element (12) and  
to provide an elastomeric spring for reducing vibrations  
transmitted from a first member to a second member.
